

SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)**Department of Computer Science and Engineering****ASSESSMENT TOOL 1 – Prompt Engineering Challenge**

Course Code:	CSA65	Course Title:	Generative AI and Large Scale Models
CO Assessed:	CO2 – Precision (BL1, BL2)	Assessment:	Assessment Tool 3 – Prompt Engineering Challenge
Weightage:	40% of CIA	Total Marks:	100 (2 Question)
CO1 Statement:	<i>Apply prompt engineering techniques and utilize pre-trained Large Language Models through modern AI frameworks and APIs to solve real-world problems.(BL1, BL2)</i>		
Student Name:	N.Somashekar Naidu	Reg. No.:	192472347
Section / Batch:	CSE-AI	Date:	08-03-2026

Instructions to Students

- Answer 2 questions. Each question carries 50 Marks. Total: 100 Marks.
 - Write clear, well-structured prompts and explanations where asked.
 - Use your own original examples — do not copy from classmates or the internet verbatim.
 - Where a diagram or worked example is requested, label it clearly.
 - Illustrate prompting techniques (zero-shot, few-shot, chain-of-thought, role/system prompting, etc.) with concrete examples, not just definitions.
- Time allotted: 30 mins

Code of Conduct

I N.Somashekar Naidu(192472347)_____ (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student: N.Somashekar Naidu_____

SECTION A –PROMPT ENGINEERING CHALLENGE**Q17. Comparative / Contrastive Evaluation Prompt**

Write a prompt that gives the model two pieces of writing (or two code snippets) and asks it to evaluate both against specific criteria, then declare a winner with justification for each criterion.

Aim:

To use an API-based Large Language Model (LLM) to compare two Python code snippets against predefined evaluation criteria, score each snippet, and determine the better implementation with detailed justification

CODE:

```
from openai import OpenAI

client = OpenAI(
    api_key="sk-proj-Nmm1xmPfR2JbBq7_hpV94dLDJUM_DtDw1-
ioZea40r1nWeg9KtC6bF6L8b_oQmrGsHdM1354gFT3BlbkFJrcYwx4GunflHp3Me
j_UMbQRinVsBZPW5n9QE360CfD0kgiRpmo67LhwZiVH_nLw8Qu1ICdPPAA"
)

prompt = """
Compare the following two paragraphs based on the criteria:
1. Clarity
2. Grammar
3. Organization
4. Readability

Paragraph A:
Artificial Intelligence helps people by automating repetitive tasks. It improves
healthcare, education, banking, and transportation. AI saves time and increases
efficiency.

Paragraph B:
Artificial Intelligence is transforming modern industries through intelligent
automation,
data-driven decision-making, and predictive analytics. It enhances productivity while
supporting innovation in healthcare, education, finance, and transportation.

After evaluating each criterion, declare the better paragraph and justify your decision.
"""

response = client.responses.create(
    model="gpt-5.4-mini",
    input=prompt
)

print(response.output_text)
```

OUTPUT:

Here is a comparison of the two paragraphs:

1. Clarity

- **Paragraph A:** Very clear and direct. It states simple, easy-to-understand benefits of AI.
- **Paragraph B:** Also clear, but uses more advanced terms like **intelligent automation** and **predictive analytics**, which may be less immediately accessible.

Winner: **Paragraph A** for simplicity and directness.

2. Grammar

- **Paragraph A:** Grammatically correct.
- **Paragraph B:** Also grammatically correct.

Winner: **Tie**

3. Organization

- **Paragraph A:** Well organized with three short, logical sentences. It introduces AI, gives examples, and ends with a summary benefit.
- **Paragraph B:** Also well organized, with a smooth flow from general impact to examples.

Winner: **Paragraph B** slightly, because it has a more cohesive and polished progression.

4. Readability

- **Paragraph A:** Easier to read because it uses shorter sentences and simpler vocabulary.
- **Paragraph B:** More formal and sophisticated, but slightly harder to read due to denser wording.

****Winner:** **Paragraph A****

Overall Better Paragraph

****Paragraph A**** is the better paragraph overall.

Justification

Although Paragraph B** is more polished and uses more advanced language, ****Paragraph A**** is clearer, easier to read, and more accessible to a general audience. Since clarity and readability are especially important for effective communication, Paragraph A comes out ahead.

RUBRICS FOR CALCULATION

Criteria	Wt.	Level 4 (Exemplary)	Level 3 (Proficient)	Level 2 (Developing)	Level 1 (Beginning)
Technique Selection	30%	Correctly applies zero-shot/one-shot/few-shot & CoT technique appropriate to each task	Applies techniques with minor mismatch to task	Limited understanding of which technique to use	Techniques applied incorrectly or not evident
Output Effectiveness	25%	Prompts produce accurate, task-appropriate outputs across all assigned tasks	Prompts work well for most tasks	Prompts work for only a few tasks	Prompts are largely ineffective
Prompt Craftsmanship	20%	Prompts are clear, specific, and reusable	Prompts are mostly clear	Prompts are vague or inconsistent	Prompts are poorly constructed
Prompt-Output Documentation	15%	Well-documented prompt-output pairs with clear rationale	Documented with minor gaps	Minimal documentation of prompts/outputs	No rationale provided for prompt choices

Design Rationale	10%	Clearly explains design choices and iterations made	Explains most design choices	Limited explanation of process	No explanation of process provided
-------------------------	------------	--	-------------------------------------	---------------------------------------	---

Marks Evaluation:

Question No.	Technique Selection (30%)	Output Effectiveness(25%)	Prompt Craftsmanship (20%)	Prompt-Output Documentation (15%)	Design Rationale(10%)	100
Q1						
Q2						
Overall Total (100)
